

NEW WIRELESS TEMPERATURE & HUMIDITY DATA LOGGER USES BLUETOOTH

Wireless Solution for Healthcare, Warehouses and More!

If you need a wireless device to monitor your product or environment, Lascar's new EL-BT-2 Bluetooth Wireless Temperature and Humidity Data logger is the perfect product. They're portable, affordable, and easy to use—it's easy to do a quick temperature check on the LCD screen while the data logger auto-saves data to its large internal memory. CAS DataLoggers offers the Lascar EL-BT-2 starting at \$170 along with FREE on-call technical support. Give us a call today at (800) 956-4437!

Flexible Applications

Whether you need temperature and humidity monitoring for HVAC validation in an office building, for quality control of Food & Beverage products, or for another application, the Lascar Bluetooth Temp & Humidity logger will fit your price point! These data loggers are also popular for use in environmental and weather monitoring, pharmaceutical storage unit monitoring, and for overwatch in agricultural applications.

EL-BT-2 Product Overview

- Simultaneously monitors and logs Temperature and Humidity
- Measures from -20 to +60°C (-4 to +140°F) and 0 to 100% RH
- LCD screen shows data and indicates logger status
- Large memory stores up to 500,000 temperature and humidity readings
- View data on your Android device or export to EasyLog Graph for Windows
- Setup and download data using Lascar's free Android app
- Rechargeable lithium ion battery

Auto-Record Data via Bluetooth

Now Lascar and Bluetooth communication make it easy to keep tabs on your products and environments! The wireless data logger's LCD screen shows Bluetooth connection status along with logger operation. The simple push-button navigation allows users to quickly cycle among Current, Min and Max recorded values. For standalone use, the EL-BT-2 comes with a rechargeable battery and can also be used with a USB wall charger.

Lascar's convenient EasyLog BT Android™ app is now available on Google Play™ and gives you wireless access to your data. The app lets you remotely configure the data logger and

download/view data on your device.

With the app you can set sample rate, alarm limits, Bluetooth power-save settings, start times and more. All downloaded data is saved to your phone's memory card and is viewable at any time. For later analysis you can then send the data via email or your preferred cloud service to another device or to a Windows PC.

Graph and Export Data

Using the Lascar EL-BT-2, users can view logged temperature, humidity readings and calculated dew point, minimum and maximum values, and alarm breaches. You can also zoom and pan in on important data with ease!
