

TANDD FOR WIRELESS TEMPERATURE MEASUREMENT

Wireless Loggers Save Companies Time and Cost

If you need to monitor temperature for an industrial process, a medical storage unit, or a storage room environment, TandD Corp. has the solution! TandD is Japan's bestselling manufacturer of temperature data loggers, popular worldwide for their reliable and affordable wireless monitoring systems. Every day at CAS DataLoggers, we provide these products in the USA for businesses and healthcare organizations. Learn more by calling us today at (800) 956-4437!

#1 in Japan, Popular Worldwide

TandD provides compact, water-proof temperature data loggers for harsh environments; wireless temperature/humidity/voltage data loggers; temperature and humidity loggers with USB or Ethernet interfaces; and micro web servers.

Features:

- ✓ View Important Data Anytime from Anywhere on Mobile Devices
- ✓ Cost-Effective Monitoring for Products and Environments
- ✓ Compact and Durable
- ✓ Remote Alarm Capability
- ✓ Software Included
- ✓ FREE Cloud Storage service

Instantly Access Data via WiFi

TR-7wf Data Loggers are next-generation 2-channel thermo recorders with wireless communication and the ability to upload data automatically to T&D's free WebStorage Service. TandD enables users to view recorded data directly from smartphones and tablets without a network!

Go Wireless with the RTR series!

TandD's RTR-500 Series Wireless Data Loggers can automatically send data and user-set alarms via cellular phone networks for remote data collection. These data loggers will also send you a 'back to normal' alarm as soon as temperatures go back to safe levels.

- Process and Manage your Important Data Anytime from Anywhere
- Low-Cost Solutions
- Wireless Communication with Expandable Range
- Remote Alarm Systems

Wired Solutions Available

TR-7nw Data Loggers are 2-channel devices with a wired LAN connection and the ability to upload data automatically to T&D's cloud storage service. In access point mode, users can view recorded data directly from smartphones and tablets without a network.
