AABB 2017 Showcases Solutions for Blood Banks

Join over 5,000 Attendees October 7th-10th in San Diego

This year, the **American Association of Blood Banks (AABB)** Annual Meeting will be held **Oct 7th – 10th** at the San Diego Convention Center in San Diego, California. **AABB 2017** will showcase the latest developments and tech in the Blood Banking, Medical, Health Care, Cellular Therapies and Blood Management industries. It also offers visitors the opportunity to network with professionals and innovators.

At **CAS DataLoggers**, we specialize in providing **temperature monitoring solutions** for blood banks and other Life Science applications. These reliable systems provide you with peace of mind and proof of your best practices.

Conference Highlights:

Featuring an estimated 5,000 attendees and 155 exhibitors, the **AABB Annual Meeting** is the premiere event for healthcare professionals in the fields of blood banking and blood management. This year's event will cover topics on transfusion medicine, cellular therapy, and laboratory, clinical, & administrative practices.

Help Protect Your Critical Blood Inventory:

Life sciences applications require continual monitoring of incredibly temperature and time-sensitive materials, including blood, vaccines, tissue samples, new medicines and drugs, and more. At CAS DataLoggers, our [Life Science Temperature Monitoring Systems](#) are popular for their ease of installation and for enabling real-time access to temperature data.

- **T&D** Wireless Data Loggers are an extensive family of temperature dataloggers and data collectors. These temperature recorders are reliable, affordable, and easy to use. The **T&D [RTR-502 Wireless Temperature Data Logger](#)** uses an external temperature sensor and a wireless gateway to transmit data directly to a free cloud service. This is a painless way to pass an audit and to give inspectors a comprehensive temperature history.
- **Accsense** wireless and wired data loggers monitor refrigerators and freezers 24/7 to safeguard your patient-critical goods and to provide advanced alarming and messaging. The popular **Accsense [WiFi Refrigerator and Freezer Monitoring Kit](#)** has everything you need to

reliably monitor blood supplies.
