

NEW IOS MOBILE APP FOR TANDD TR-4 DATA LOGGERS

CAS is pleased to announce that T&D has released a new mobile app, TR4 Report, for the [TR4 Series](#) of temperature data loggers. The app was created to meet customer requests for a quick and simple way to generate reports on a Smart Device. It allows you to easily download data via Bluetooth and immediately create reports to determine at a glance as to whether or not proper temperature was maintained during transportation, storage, and so on. Once created, the reports can also be annotated, saved as a PDF file, printed, emailed or shared with other apps that support the PDF format. The report includes key information such as minimum and maximum tempera-

tures, time outside of the temperature limits and mean kinetic temperature (MKT) during the reporting period.

The new mobile app is compatible with all of the TR4 series of Bluetooth data loggers including the TR41, TR42 and TR45. The app is now available for download from the [App Store](#) and supports iOS 11.0 or later.

Below is an example of a PDF report that can be generated using the new TR4 Report app.

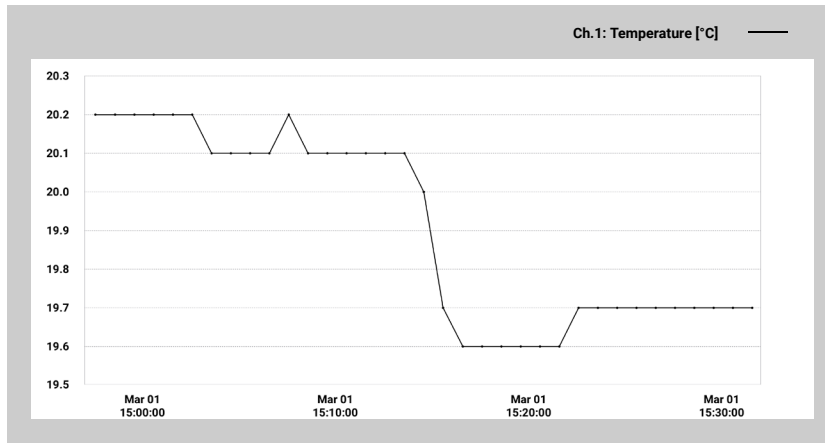

Device Information
Device Name : TR42_682E05DB
Model : TR42
Serial Number : 682E05DB

PDF report

Report Details **Time Range** : 14:57:00 Mar 01, 2021 - 15:32:00 Mar 01, 2021 (35min)

Data Count : 35 readings
Rec. Interval : 1min.
Rec. Mode : Endless

Alarm Settings

Channel No.	1
Upper Limit	----
Lower Limit	----

Summary Report

Highest	20.2 °C
Lowest	19.6 °C
Average	19.9 °C
Total Time of Alarm	0min
MKT	19.91 °C
