

NEW PRODUCT ANNOUNCEMENT

NEW RADIONODE RN SERIES WIRELESS DATA LOGGERS

CAS Dataloggers is pleased to announce that we now offer Radionode data loggers from [Radionode](#). The RN400 family of compact, wireless data loggers include models for temperature and temperature/humidity with other models coming soon. They offer WiFi connectivity, and the ability to operate off an external DC power source with an internal battery backup. Data can automatically be uploaded to their cloud server or a PC.

KEY FEATURES:

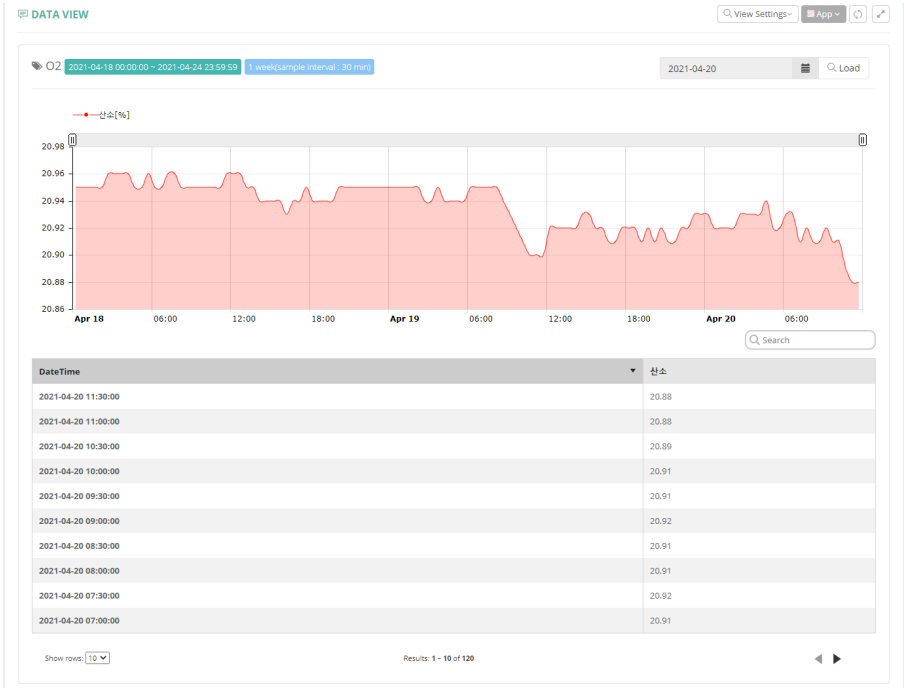

- SD card support for local data backup
- Bright OLED display
- Power outage reporting
- HTTP output for use with 3rd party software
- Email data reports

Currently, there are 2 models available:

- [RN400-H2PS](#) with an internal temperature and humidity sensor plus one input for an external NTC thermistor
- [RN400-H2EX](#) with 2 external PT100 or type K thermocouple inputs plus a digital input for a door switch

The Radionode data loggers are ideal for monitoring ambient environmental conditions, and refrigerators and freezers in food, life science, pharmaceutical, and cleanroom applications.

For more information on the new [Radionode RN400 data loggers](#), or to find the ideal solution for your application-specific needs, contact a CAS Data Logger Applications Specialist at **(800) 956-4437** or [request more information](#).
