

## CAS TO EXHIBIT AT ONE WATER CONFERENCE THE SHOW FOR WATER PROFESSIONALS, JUL 26-27 IN CLEVELAND, OH

---

One Water Ohio is a collaborative effort between the Ohio Water Environment Association (OWEA) and the Ohio Section of the American Water Works Association (OSAWWA). Every year, One Water Ohio puts on a technical conference & expo for the water and wastewater professionals of Ohio. This year, [One Water Conference](#) will be held at the Huntington Center in Cleveland, Ohio from July 26 to July 27, 2022. CAS DataLoggers President Peter Martin is attending along with CAS DataLoggers Engineering Manager Terry Nagy to feature the [OdaLog](#) gas loggers, manufactured by ThermoFisher.

Come visit us at the CAS Booth #630 for a look at the latest H<sub>2</sub>S gas and odor monitoring technology, all designed to survive in harsh environments. The OdaLog's purpose is to monitor gas levels to help control H<sub>2</sub>S gas in sewerage systems and treatment plants for later review and evaluation using OdaStat-G software. We will be featuring the new [OdaLog G20](#) model, the first gas logger with smart digital sensors and offering extended field life.

Exhibit Dates: July 26, 2022 - July 27, 2022

Exhibit Hours: Tuesday, July 26, 10am – 5pm  
Wednesday, July 27, 10am – 5pm

## BE THE FIRST TO SEE CUTTING-EDGE TECHNOLOGY!

One Water Conference is the largest gathering of water professionals in the Midwest. The conference is designed for water professionals to explore, learn, network, grow professionally, and strengthen their connection to the water community.

Pete Martin and Terry Nagy will be on hand at the booth showing visitors how to automate [gas and odor monitoring](#) using OdaLog data loggers. Thanks to OdaLog's simple and effective gas monitoring, data can be quickly downloaded using IrDA or Bluetooth Wireless communications links.
