

NEW FRIGGA TRANSPORT DATA LOGGERS FROM DEWAV IoT GROUP

CAS Dataloggers is pleased to announce that we have entered into an agreement with [Dewav IoT Group](#) to bring the FRIGGA line of real-time transportation data loggers to the US market. The FRIGGA product line includes smart tags, single-use, and multi-use data loggers that can track parameters such as temperature, humidity, shock, tilt, and light during transit. These real-time monitors utilize global LTE 4G/5G cellular communication with global roaming and LBS base station positioning to provide continuous in-transit measurement data and position with alerts via SMS, email, or a mobile app. Models using alkaline batteries allow shipment without ITATA Dangerous Goods restrictions. The FRIGGA cloud software allows you to view data and generate reports using a standard web browser.

Finally, mobile apps are available for both Apple and Android devices to provide the convenience of real-time monitoring from your cell phone or tablet.

For more information on FRIGGA cost-effective cold chain monitoring systems, or to find the ideal solution for your application-specific needs, contact a CAS Data Logger Applications Specialist at **(800) 956-4437** or visit our website at www.Data-LoggerInc.com.
