

DELPHIN TECHNOLOGY INCREASES DATA STORAGE AT NO ADDITIONAL COST

CAS DataLoggers is excited to announce that, effective immediately, Delphin Technology is equipping the majority of their [DAQ devices](#) with 32 GB of internal data storage as standard, without any increase in price. This enhancement allows for significantly longer recording times, even with high channel counts and sampling rates, providing exceptional value for our customers.

The following devices now feature 32 GB of internal memory:

ProfiMessage D
Expert Logger
Expert Transient
Expert Vibro

With this upgrade, [ProfiMessage D](#) and [Expert Logger](#) can now store up to 960 million measured values, while [Expert Vibro](#) and [Expert Transient](#) can hold up to 2.3 billion measured values thanks to advanced block data formation. Delphin Technology is committed to enhancing their products to meet the evolving needs of our customers while maintaining competitive pricing.

For more info on the Delphin data storage increase, or to find the ideal solution for your application-specific needs, contact a CAS Data Logger Applications Specialist at **(800) 956-4437** or www.DataLoggerInc.com.
